

How to get the Python environment with all the required packages (Windows only)

Step 1

Download the following folder in your pc:

<https://drive.google.com/file/d/1d0lyfhedWvLInvVSpKB6ye9Cvo1G-anW/view?usp=sharing>

Step 2

Unpack the *.tar.gz* environment file where you want your environment goes.

Step 3

Unpack the environment and activated it.

Note: Please use Command Prompt, not Anaconda Prompt or Powershell.

```
cd BIMFEMenv
.\Scripts\activate.bat
.\Scripts\conda-unpack.exe
```

Step 4

Run Python in your unpacked environment

```
(BIMFEMenv) C:\Some\Path\Where\Your\Environment\Is> python
```

Now remember to activate your environment when running your code 😊
